

Creative research for complex problems

CMAC
Center for Mind and Culture

ABOUT US

We want a better world.

But we are surrounded by complicated, overwhelming and seemingly hopeless social problems.

We have the tools at our fingertips to unravel their knots. CMAC is transforming that technology to confront the challenges of our time.

“CMAC is a home for veteran and apprentice researchers alike, where innovative ideas are embraced and new frontiers of research emerge”

– Christopher Greene

OUR MISSION...

The Center for Mind and Culture (CMAC) is a non-profit research center that innovates creative solutions for urgent and complex social problems. Committed to a radically interdisciplinary, non-partisan, high-tech approach, CMAC mobilizes an international network of experts to develop and disseminate visionary insights to public and professional stakeholders.

OUR STRATEGY...

Research

CMAC develops, supports, and catalyzes research initiatives into the unendingly rich nexus of mind and culture.

Training

CMAC provides an institutional locus for training people to conduct cutting-edge research into diverse phenomena.

Outreach

CMAC disseminates knowledge about the mind-culture nexus so as to have a positive influence on both academic scholarship and the general public.

OUR CURRENT RESEARCH...

- develops and disburses groundbreaking STEM technology for children on the margins
- combats Nightmare Disorder from residual trauma utilizing specialized VR technology and techniques
- distills big datasets to disrupt pathways of child trafficking
- and much more...

CMAC Devises Actionable Solutions Within Four Main IMPACT Areas:

RESEARCH THAT...

Models Social Systems

we predict trends, estimate threats, inform policy, test potential solutions and ascertain the expected impacts of a changing world

Engages Virtual Environments

we access the power of an ever-advancing high-tech sector to promote equality, cultivate inclusiveness and reduce suffering

Quantifies Identities and Ideologies

we distill insights about the worldviews and individual behaviors that propel the concords and the conflicts within our communities

Charts Academic Landscapes

we uncover a better sense of what defines a discipline and begin to imagine the ways we might further improve our scholarship

“CMAC studies the core of humanity’s most complex problems to imagine creative, conscious, systematic paths into the future”

– Mary Williams

“CMAC is the future of interdisciplinary work; it unites the social and natural sciences to explore the most interesting dimensions of human life”

– Kate Stockly

We distinguish ourselves by

WHAT WE TARGET: complex social systems and the wicked problems they produce

THE TOOLS WE USE: data analytics, computational modeling, neuroimaging, and whatever else is most useful

THE PEOPLE WE RECRUIT: diverse talent from every sphere of human wisdom

CMAC is a leader in applying high-tech tools to solving complex social problems. We have carved a niche in making vital but inaccessible information decipherable for practical problem solving.

We excel at amplifying the versatility and practical social impact of highly trained scholarly and scientific minds.

We can do all this and more when we work collaboratively, apply expert research, and put high-tech tools into the hands of incredibly creative and compassionate people in every domain of human endeavor.

Please join us in this effort. Partner with us to unite knowledge and impact. Help us deploy powerful new high-tech tools to alleviate suffering and improve human lives.
